

“Effective Document Management is essential – Oracle is so much better than SharePoint”

said Tammy Peters, Managing Director.

Oracle Products:

- **Content & Experience Cloud**

Cloud Specialists - Documents, Databases, Workflow

Interior design is communicated with documents and images.

TMP Interiors are Commercial Interiors specialists, providing a range of superior commercial interior refurbishment and build services to clients across Buckinghamshire, Berkshire and London.

TMP Interiors offer clients unrivalled levels of professional service and quality standards, the success is driven by continued customer satisfaction

The skill of interior design is combining the space with the furniture and colours. As a business, documents and images are essential to communicate concepts.

Storing the material in SharePoint gave performance problems when working at customer sites.

TMP Interiors selected Oracle Content & Experience Cloud as a repository to manage the documents and images. A key feature in selecting the cloud was the ability to use “Synch” material on laptops and tablets with the Oracle repository to enable effective work at customer sites.

Ether Solutions worked with TMP Interiors to organise usage of the cloud across the business and to assist with the transfer of the material from Microsoft SharePoint.
